

Grease Master Mini

Grease Master Mini - Entry Level Grease Trap

The Grease Master Mini is a budget or entry level grease trap and provides a level of protection for smaller sites such as Church Halls, Village Halls or Club Houses.

Manufactured from rotationally moulded Polypropylene, the unit will provide years of problem free grease management if properly maintained.

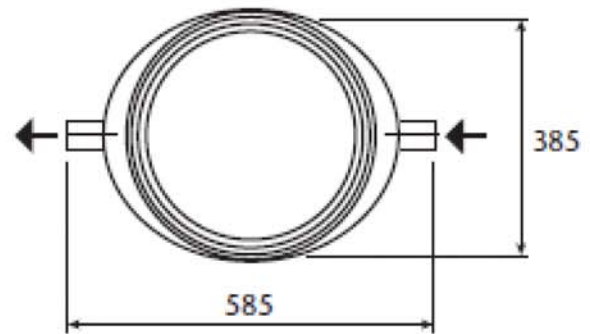

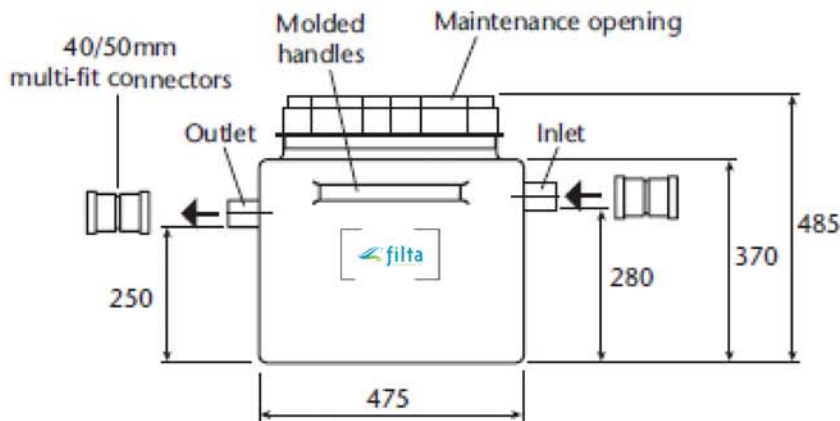

Collected grease is removed on a daily basis and is easily done once the sealed, screw top lid is removed.

The Grease Master Mini is supplied with easy to follow installation instructions and includes 50mm push fit connections. Fitting is an easy job for a handy man or plumber.

Please call us to find out how to correctly size your greasetrap
