Antiviral Sanitising Service (Kills the COVID-19 virus)

APPROVED COVID-19 SANITISING

Our preventative sanitisation service utilises eco-friendly, naturally derived, mild surfactants and a natural fermentation extract to produce an environmentally-responsible and sustainable cleaner and disinfectant.

99.9%

of Envelope Viruses, Flu
and Bacteria are killed

100%

EN14476 approved to fight against
envelope viruses for Coronavirus
(e.g. SARS, MERS, COV-19)

5min

Kills envelope viruses in 5 min

THREE SIMPLE STEPS TO ON-SITE SANITISATION

Our nationwide fleet of technicians are ready to sanitise and disinfect your premises with our laboratory tested and approved all-purpose sanitiser. The ingredients in our all-purpose sanitiser work in synergy to ensure efficient kill of a wide range of microbial species.

A trained Filta technician will arrive at your restaurant and thoroughly spray a light mist of all-purpose sanitiser throughout your site that is 99.999% effective at killing envelope viruses and bacteria.

The technician will then wipe-down any high-touch areas such as door handles and railings. The sanitiser kills, destroys and eliminates all envelope viruses.

The solution is colourless with a near odourless scent allowing your business to operate as normal. Our technician will leave behind a sheet with the date of last clean, areas cleaned and our contact details.

ON-GOING SERVICE

A trained technician will then educate your employees on how to keep your restaurant sanitised and leave a tailored **"antiviral maintenance pack"** of our all-purpose sanitiser. Alternatively, we will arrange for a Filta technician to regularly visit your premises to continually reduce the risk of infection. ** Please note that our service is not limited to restaurants and we provide a range of businesses with effective COVID-19 sanitising services.*
